INTRODUCTION

This directory lists programs approved by the Massachusetts Department of Public Health, Division of Alcoholism and Drug Rehabilitation pursuant to M.G.L. Chapter 90, Section 24 and Section 24D. These programs include driver alcohol education programs for first offenders as mandated by Section 24D and fourteen day residential alcohol treatment programs for second offenders as mandated by Section 24.

Programs are listed by region, and then in alphabetical order. The courts which the programs primarily serve are listed in the right hand column.

FIRST OFFENDER PROGRAMS

The first offender Driver Alcohol Education Program is a 40 hour program whose goal is to provide an educational opportunity related to alcohol use and abuse and drinking and driving for first offenders choosing the 24D option. While the program is educational in nature, it is not limited to the provision of information. The educational process attempts to modify the drinking behavior of participants in order to reduce future driving while intoxicated offenses. The program requires forty hours of participation for all offenders and has three components:

- a two hour assessment to explore client drinking habits and to place clients in appropriate group sessions
- thirty two hours of group educational sessions which are interactive and aim to assist clients to identify and change problematic drinking behaviors
- three forums, each two hours long. One forum will be a presentation by family members of victims of drunk driving accidents. Two of the forums will be self-help meetings following the principles and practices of Alcoholics Anonymous.

The programs have strict requirements for participation. A violation of the program requirements can be a probation violation and can result in termination of the 24D option and imposition of the mandatory one year license revocation.

In addition, three fourteen day residential programs are approved as 24D programs for first offenders who have not complied with the program requirements of the driver alcohol education programs. The fourteen day programs recommend up to one year of outpatient counseling upon completion of the residential program as a condition of probation.

FOURTEEN DAY SECOND OFFENDER PROGRAMS

Individuals convicted of a second DUI offense within a six year period are either incarcerated for 14 days or participate in a 14-day residential program. Judges may offer a second offender the DUI Residential Program when they believe that offenders may benefit. If the option is offered, offenders may choose to participate.

The goal is to prevent future incidents of driving under the influence by changing drinking and substance abuse behaviors. Program components include confinement and rehabilitation. Confinement removes offenders from alcohol and drugs for two weeks and helps initiate sobriety. The rehabilitation includes individual and group counseling, Alcoholics Anonymous and Narcotics Anonymous meetings, substance abuse education, and health promotion.

Clients who complete the program have an aftercare plan which may consist of additional residential rehabilitation, outpatient counseling and other support services. Further counseling is required as a condition of probation and failure to comply may result in return to court and the imposition of additional sanctions.
